Decatur, GA 30033

August 28, 2006

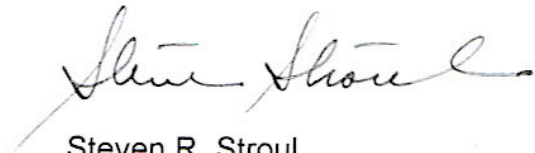

Dear Russ,

As a test marketer of your secure one machines, My staff and I have come to the following conclusions :

- We installed the machines in paper vending machines.
- We tested three machines for 90 days.
- We found no problems with the public accepting these machines.
- We had no problems with the mechanisms, once we got them adjusted properly.
- There was no pilferage from any of the machines.
- The only issue that I have with the machine, was the capacity. We couldn't place the machine in mid - range volume accounts because we needed more slots for the Friday, weekend edition, (USA TODAY).

I will send the machines back to you. One will be sent this week and the other two, two weeks later. I appreciate the opportunity that we had to test your product. With some modifications, it is a viable product for locations where pilferage is a problem and there are good sales in that location. Thank you.

Sincerely,

Steven R. Stroul
President

CC: Debra Swift, USA Today, Buffalo, NY.
